

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

These cases are, I think, sufficient to encourage farther trials. I am, with true respect,

S I R,

Your most obedient humble servant,

W. Oliver.

XIV. *Observationes Eclipsium Satellitum Jovis habitæ Ulissipone in Regio Collegio Beatissimæ Virginis à Necessitatibus nuncupatæ, à Joanne Chevalier Cong. Oratorii & Regalis Societ. Lond. Socio, Anno 1754.*

Read Feb. 27,
1755.

DIE undecima Januarii, telescopio magno Gregoriano, long. 6 pedum dimidio, nocte clarissimâ, observavi immerfionem secundi Satellitis horâ postmeridiana temporis veri, 9^h. 4'. 3". Hac, ac sequentibus diebus, clarè conspiciebantur fasciæ duæ in disco Jovis.

Die decima-quinta Januarii, eodem telescopio, cælo etiam claro, observavi immerfionem primi Satellitis horâ postmeridianâ temporis veri, 11^h. 23'. 58".

Die decima-octava Januarii, eodem telescopio, observavi immerfionem secundi Satellitis horâ postmeridianâ verâ, 11^h. 35'. 30".
